

## Description

These synthetic thermal blankets are used to provide insulation/protection against loss of body temperature in winter and cold climates.

They are produced with the appropriate insulation capacity depending on the thermal resistance of garments (TOG) and the air permeability of the material.

The blankets are made out of raw, odourless, high quality materials that are soft to touch for maximum comfort, and are highly recommended for indoor and outdoor use.

Key Features UNHCR / ICRC / IFRC / UNICEF Standard Thermal and air flow resistant  
Minimum 4.0 TOG for indoor use in cold climates 1.5m x 2m high thermal synthetic blankets made of virgin fibers from polyester, knitted & dry raised on both sides, ISO 1833 on dry weight, 100% virgin polyester UV-proof, waterproof, rotproof and fire resistance
